

# DOCTOR OF NURSING PRACTICE PROGRAM, DNP

---

Campus: NYC

## Program Information

It's a fact: a Doctor of Nursing Practice (DNP) from Pace University's College of Health Professions provides the innovative learning opportunities you need to become a clinical leader in advanced nursing and primary health care. Our post-master's program has been specially designed to allow you to accelerate your career trajectory while evolving your current practice. As you advance, you will forge lasting relationships with fellow students – all while building new knowledge under the supportive guidance of mentors and faculty alike. Our program also provides students with several opportunities, such as:

- Completing an evidence-based clinical practice improvement DNP project under the mentorship of a DNP program faculty member
- Attending the AANP Health Policy Conference and lobbying on Capitol Hill

Based in our Pleasantville campus, our executive blended-learning format combines online and in-person coursework – meaning you can still fulfill your work and personal commitments while earning your DNP through this flexible program.

Doctor of Nursing Practice Program (DNP) is a post-master's program for family or adult acute care nurse practitioners. This innovative curriculum meets the eight essential areas identified by the America Association of Colleges of Nursing for the DNP.

## DNP BRIDGE PROGRAM

Although the Pace DNP program is designed for family or adult-gerontology acute care nurse practitioners, we now have an option for adult, pediatric, geriatric, and women's health master's prepared nurse practitioners who wish to obtain FNP certification as an FNP-DNP or adult-gerontology acute care certification as an AGACNP-DNP. If you are interested in this option, you will need to meet with the Program Director who will conduct a gap analysis to determine what additional clinical courses will be required.
