HEALTH INFORMATICS, MS

Campus: Online

BE PART OF THE FUTURE OF HEALTHCARE

A collaboration between Pace University’s College of Health Professions and Seidenberg School of Computer Science and Information Systems, our Health Informatics master’s degree is an exceptional interdisciplinary program at the intersection of healthcare and technology.

Graduate fully equipped to work in a variety of health- and technology-related fields, such as artificial intelligence (AI), software development, electronic medical records (EMR), and health trend tracking.

Thoughtfully designed for working professionals interested in advancing their careers or moving into a new field.

You’ll be prepared to work at top institutions in the field, including Memorial Sloan Kettering, NewYork-Presbyterian, Columbia Medical Center, and New York University, as well as major pharmaceutical companies, including Pfizer, Regeneron, and Bayer.

Through a Master of Science in Health Informatics, you will develop a command of healthcare, information systems, databases, and information technology in order to develop data-driven solutions to improve health services, reduce costs, and create efficiencies through strategic data analysis. The program is designed for working professionals—healthcare IT technicians, medical clinicians, non-health IT programmers, analysts and data administrators—who would like to leverage their existing skill set into this emerging and impactful field, as well as those looking for a career change.
