PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER PROGRAM, PMHNP

Campus: Online

Psychiatric Mental Health Nurse Practitioner Program of Graduate Study (Online Program*)

The Psychiatric Mental Health Nurse Practitioner (PMHNP, master’s 42 credits, CAGS credits determined by gap analysis) program in the Lienhard School of Nursing, uses a primary health care and lifespan focus to prepare students for advanced practice in psychiatric mental health nursing. Students are prepared to practice in various settings including communities, private practice, institutional settings, substance abuse settings, and shelters. The program provides health promotion, disease prevention, assessment, and treatment of psychiatric diseases and disorders across the lifespan, with particular attention to health disparities and the care of vulnerable populations. Strategies used will include, but are not limited to, treatment, medication management, case management, individual, family and group therapy.

The program is offered as a master of science for those looking to enhance their career or as a Certificate of Advanced Graduate Study (http://catalog.pace.edu/graduate/schools/college-health-professions/curriculum-information/certificate-graduate-studies-programs/psychiatric-mental-health-nurse-practitioner-pmhnp-certificate/) for those already master-prepared as advanced practice nurses.

*Asynchronous and synchronous didactic content. Students are required to come to campus up to two times per semester. Dates to be determined.
