

INTERNET TECHNOLOGY FOR E-COMMERCE CERTIFICATE

The Internet revolution has transformed the way we live and work. As a result, it has created a demand for individuals with the skills and knowledge to build the infrastructure to make websites more than mere sources of information. In light of this need, Pace's Seidenberg School of Computer Science and Information Systems has designed a five-course, interdisciplinary, advanced certificate program in Internet Technology for e-Commerce. The program is offered entirely online. Students completing this will learn Internet programming, network design and server setup, configuration, and security.
