

ART (ART)

ART 102 Art History: Ancient through Gothic Art (3 credits)

First half of a year-long introductory survey of the major monuments of western art from ancient history through the Gothic period. Works of architecture, sculpture and painting are studied with special attention given to the development of style as well as the various techniques and qualities of each medium. The principles, basic methods, and terminology of art historical analysis are introduced. This course may be taken independently of ART 103. The class may visit the Metropolitan Museum of Art. Students may be required to cover museum admission fees.

ART 103 Art History: Renaissance through Modern Art (3 credits)

Second half of a year-long introductory survey of the major monuments of western art from the Renaissance to the twenty-first century. Works of painting, sculpture, and architecture are studied within their historical contexts. This course may be taken independently of ART 102. The class may visit the Metropolitan Museum of Art. Students may be required to cover museum admission fees.

Course Rotation: Spring.

ART 130 Sculpture I (3 credits)

Students are introduced to a variety of traditional and contemporary techniques and approaches to sculpture. Casting processes are demonstrated, and students complete assignments using both glyptic and plastic methods.

Course Rotation: NYC: Fall and Spring. PLV: Fall.

ART 133 Ceramics I (3 credits)

A studio course designed as an introduction to the forms and techniques of ceramics. Students learn wheel-throwing and hand-building techniques with emphasis on functional forms. Students form, glaze, and kiln fireworks of their own design.

Course Rotation: PLV: Fall, Spring, and Summer.

ART 138 Painting in Watercolor I (3 credits)

Students will explore the freshness and spontaneity of this challenging medium. The course will address problems of visualization, technique, and the manipulation of materials. ART 138 is an introduction to watercolor painting, including materials, techniques, and an overview of the diverse cultural traditions of this venerable art medium. This class will consist of in-class painting assignments, group discussions, field trips, slide lectures, and weekly homework assignments emphasizing skill building and creative exploration.

Course Rotation: NYC: Fall and Spring.

ART 140 Drawing I (3 credits)

Students learn basic drawing techniques and experiment with media including pencil, charcoal, and pen and ink. Students acquire basic drawing skills and learn to draw from direct observation through projects including still life, landscapes, or abstraction. Figure drawing and linear perspective are introduced as are more conceptual approaches to drawing.

Course Rotation: Fall, Spring, and Summer.

ART 145 Painting I (3 credits)

Contemporary painting materials and techniques are demonstrated using acrylic paints and mediums. The course includes basic color theory and its application to both figurative and abstract painting. Students work with a variety of subjects.

Course Rotation: Fall, Spring, and Summer.

ART 153 Introduction to Photography (3 credits)

Students learn basic photographic techniques using the 35mm film camera. Students are introduced to cameras and equipment. Extensive darkroom work includes film processing, printing and enlargement of negatives, mounting and presentation of prints.

Course Rotation: NYC: Fall and Spring. PLV: Fall and Spring.

Prerequisites: A 35mm camera capable of manual control of F/stop and shutter speed.

ART 155 Documentary Photography (3 credits)

This course will introduce students to the practice and ideas of documentary photography through the completion of a project or series of related photographs. Students will be introduced to digital and analogue processes in color and B&W, and to trends and ideas in contemporary and historical documentary work. With greater skills and context in place, students will begin to put together a photographic project. They will be required to present work for critique every other week, complete a midterm presentation and project proposals, and complete the corresponding body of work self-published in published form.

Course Rotation: Fall; Spring

ART 160 Digital Photography I (3 credits)

Digital Photography I is a studio art course designed to introduce students to the use of the digital camera and to photography as a visual means of expression. Emphasis is on the expression of ideas through learning digital techniques, camera control and output options.

Course Rotation: NY: Fall and Spring

ART 164 Principles of Design (3 credits)

An introduction to the principles of design in the two-dimensional media. The course consists of demonstrations, lectures, and studio projects aimed at the development of the skills and concepts underlying the design process in a wide variety of visual art forms. Composition, balance, harmony, symmetry, and asymmetry will be explored along with basic color theory and application.

Course Rotation: Fall.

ART 165 Mixed Media (3 credits)

This course introduces students to a wide range of techniques in drawing, painting, collage and two and three-dimensional design. Students will experiment with media including watercolor, paint, cut-paper and graphite over many support materials, including mylar, photographs, magazines, etc. the course will consist of lectures, studio projects and a museum visit.

Course Rotation: NY, Spring.

ART 167 Printmaking I (3 credits)

Course Rotation: The basic techniques of printmaking will be explained and demonstrated. Students will execute their own designs in black and white and color and print small editions. TBA.

ART 169 3D Design (3 credits)

This course will teach students basic elements of spatial design. Working with both simple constructive materials as well as 3D computer modeling software, students will explore the possibilities of organic and inorganic forms for both aesthetic and practical three-dimensional objects.

Course Rotation: NYC: Fall and Spring.

ART 173 Graphic Design I (3 credits)

This course acquaints students with current processes of graphic reproduction utilizing the computer. Typefaces are compared and their appropriate uses demonstrated. Copy layout and all procedures involved in the production of finished mechanicals are explained and demonstrated. Practical studio work by students includes the complete preparation of advertisements, magazine pages, book covers, etc.

Course Rotation: PLV: Fall.

ART 174 Picturing Art in Film and Video (3 credits)

The art of cinema can also be the cinema of art, that is, movies made about art and artists. This course will focus on the last fifty years of American art seen through films and videos produced up to the present time. Analysis of the a wide range of filmic approaches will contrast biographical dramas such as Pollock and Basquiat with classic documentaries such as Painters Painting, experimental narratives like Downtown 81 (with Jean-Michel Basquiat), or hybrid documentaries such as Charlie Ahearn's Artist Portrait Videos. The primary focus will be on the evolution of art and artist's studio practice.

Course Rotation: NY: Spring.

ART 176 Visual Literacy (3 credits)

Visual Literacy introduces the study of our visual environment through readings, films, and design projects. We begin with an analysis of elements of visual design, and we read, create, observe, and respond to media, advertising, the web, film, and comics. There will be a balance between observation and readings with engaging experientially in creative projects.

Course Rotation: TBA

ART 180 Introduction to Museum and Curatorial Studies (3 credits)

This course will introduce students to the principles and practices of museum studies through an interactive seminar structured around the multiple functions performed by curators in various phases of their work. Weekly reading assignments on key topics addressing the changing role of museums in the 21st century will be supplemented with oral and written exercises encouraging students to experience more directly the key issues facing curators in art museums and commercial galleries all across the professional spectrum. The student's participation in the course will culminate in an oral presentation to the class and a corresponding term paper, focusing on a hypothetical exhibition to be planned by the student throughout the course, in consultation with the instructor

Course Rotation: PLV: Fall

ART 181 Digital Drawing I (3 credits)

This course is an introduction to media and techniques of digital drawing. The focus is on drawing and design, students may use whichever software programs they choose although the program Procreate is recommended and is loaded on the Pace iPads. *This course does not teach software, it is not a technical course, it is a step-by-step approach to an analysis of drawing tools and content. Basic skills particular to digital drawing will be developed through a variety of exercises that will address design by simplifying and isolating elements such as line, form, texture, and color. Weekly critiques will reinforce the basics of design and technique as students share their techniques and process.

Course Rotation: Fall, Spring, and Summer 1

ART 186 Digital Design I (3 credits)

This course will introduce the student to fundamentals of digital design including imaging collage, typography, composition, form, perspective, and color theory. This course will explore artwork and graphics on the Macintosh Platform, familiarizing the student with Adobe Photoshop, Adobe Illustrator, and InDesign. The focus will be on acquiring creative artistic methods through projects and week-by-week skill development. Students will gain an understanding of the principles of design and art as a means of visual communication.

Course Rotation: Fall and Spring.

ART 188 Art as a Vehicle of Social Commentary and Political Progress (3 credits)

Political art has entered into mainstream discourse as an integral part of a new, more theoretically grounded and socially contextualized historical practice. Students will examine selected works of contemporary art conceived as social commentary and/or political protest. Class discussions will focus on the political relevance of current art, for example, Public Art and the controversy surrounding the World Trade Center memorial, Feminist Art, and media Technology and its uses as an interactive vehicle to advance social change.

Course Rotation: NYC: Fall, PLV: Fall.

ART 189 Video I (3 credits)

This class is designed to introduce students to fine art video art production and filmmaking. Students learn camera techniques, storyboarding and editing. The focus is on acquiring skills through projects developed individually and in groups. Projects include both narrative and non-narrative approaches to the medium of video. Emphasis is on visual art and film as communication and basic approaches to filming, editing and post-production.

Course Rotation: NYC: Fall, Spring.

ART 196K Topic: Principles and Techniques of Digital Photography (3 credits)

The major goal of this course is to familiarize students with current digital photography techniques and equipment. By using a hands-on and laboratory/lecture approach, we will be able to produce a wide variety of projects using both studio and field procedures. Some of the areas we will cover include: composition, lighting, focus, content based story-telling, digital printing, and adobe Photoshop post production.

Course Rotation: Spring;PLV

ART 196M Build it in Clay (3 credits)

This course is designed as an introduction to ceramics with specific focus on the use of self-hardening clay to build several projects ... using a variety of media, the students will explore primitive through contemporary ceramic forms to help them design and build their projects. Acrylic paint with clear coat finish will be used to complete the projects.

Course Rotation: Fall

ART 196N Topics: ICP Photography: Home and The Places We Live (3 credits)

Home and the Places We Live is an exploration of house, home, identity, family, and history through still life photography. Students will create still life photographs in the places where they spend the most time. We will pay attention to light, balance, object, and narrative in the singular image. In addition to making images, critiques are essential part of the learning process in the course and are an opportunity for us all to come together with fresh eyes to explore how the work functions, and how your ideas align with the work's impact on the viewer. Students will look at the work of contemporary artists and consider their own work in relation to these innovative image makers. In addition to attending all 10 class sessions, students are required to complete a writing project with the ICP Program Coordinator, Derek Stroup. Students need provide their own camera. A DSLR or iphone camera is acceptable for this course. Students with questions about the course or equipment can contact The ICP Program Coordinator, Derek Stroup by email: dstroup@pace.edu All skill levels are welcome.

Course Rotation: NYC: Fall and Spring

ART 197 American Art (3 credits)

Course Rotation: TBA.

ART 200P Topic: Introduction to Basic Computer Design (3 credits)

Course Rotation: TBA.

ART 201 Art History: Ancient Greek Art (3 credits)

Survey of Greek architecture, sculpture, and painting from their origins in pre-historic art through the periods of Minoan, Mycenaean, geometric, archaic, classical, and Hellenistic art. Works of art may be studied on a first-hand basis in the Metropolitan Museum of Art.

Course Rotation: NYC: Fall - Odd years.

ART 202 Ancient Greek and Roman Art (3 credits)

A chronological study of the architecture, sculpture, and painting of the ancient civilizations in Greece and Italy, concluding with the reign of Emperor Constantine. Includes trip to the Metropolitan Museum of Art.

Course Rotation: PLV: Spring - Even years.

ART 203 Art History: Ancient Roman Art (3 credits)

Art and architecture of the Roman Empire from its beginnings on the Italian peninsula, through its expansion across Europe, North Africa and parts of the Middle East. The course examines how the Romans effectively incorporated the heritage of Greek art into their own, creating a rich and diverse artistic milieu that they subsequently disseminated throughout the lands under their dominion. Particular attention is paid to the role of art in political propaganda, the methods by which art was transmitted to the provinces, the interaction between painting, sculpture, and architecture, and finally how Roman art was gradually adapted to the needs of the Christian faith. Works of art may be studied on a firsthand basis in the Metropolitan Museum of Art. Students may be required to cover museum admission fees.

Course Rotation: NYC: Fall - Even years.

ART 204 Art History: Medieval Art (3 credits)

A brief overview of the arts of the early Middle Ages introduces a careful study of the architecture, sculpture, painting, and decorative arts of the 11th through the 14th centuries in western Europe. In architecture, an emphasis will be placed on the building of cathedrals during the Romanesque and Gothic periods. May include trips to the Metropolitan Museum of Art and the Cloisters.

Course Rotation: NYC: Fall - Odd years. PLV: Fall - Even years.

ART 205 Contemporary Art History (3 credits)

Study of works of art created primarily in America and Europe after World War II with an emphasis on the last thirty years. The material covered includes painting, sculpture, and video, performance works, installation art, digital art, and new media. Students may study works of art on a firsthand basis at the Museum of Modern Art, the Whitney, and art galleries in Chelsea. Students may be required to cover museum admission fees.

Course Rotation: NY: Fall, even years.

ART 206 Art History: Renaissance Art in Italy (3 credits)

A study of Italian renaissance art from the early 14th-century frescoes of Giotto to the Mannerist style of the 16th century. Painting, sculpture, and architecture are covered. Works of art will be viewed in their social, historical, and religious contexts, with emphasis on the patronage and original function of the work of art. Special attention will be given to the works of Leonardo da Vinci, Raphael, and Michelangelo. May include a trip to the Metropolitan Museum of Art.

Course Rotation: NYC: Fall - Even years. PLV: Spring - Odd years.

ART 207 Art History: Architectural History of New York City (3 credits)

Study of the history and development of architecture in Manhattan from the late 18th century to today. The course is taught primarily on the street and involves firsthand examination of architecture in different neighborhoods in Manhattan including early architecture downtown, Art Deco skyscrapers in midtown, and contemporary architecture in Times Square. The class visits several museums and students may be required to cover museum admission fees. This course may be offered independently or as one half of a Learning Community.

Course Rotation: NY: Fall.

ART 208 Art History: Renaissance in Northern Europe (3 credits)

A study of the painting, sculpture, and the graphic arts in France, Germany, and the Netherlands during the Renaissance and Reformation (1400 to 1600) including the work of major artists such as Jan van Eyck, Hieronymus Bosch, Albrecht Dürer, Matthias Grünewald, Hans Holbein the Younger, and Pieter Bruegel the Elder. Focus is on altarpiece painting and sculpture, portraiture, the development of printing techniques, the impact of the Protestant Reformation on art, and the influence of Italian Renaissance art in the north. The class may visit the Metropolitan Museum of Art and the Cloisters. Students may be required to cover museum admission fees.

Course Rotation: NYC: Spring - Even years. PLV: TBA.

ART 209 Art History: Baroque Art in Flanders and Holland (3 credits)

A study of the painting, sculpture, and the graphic arts in the two territories, Flanders and Holland, during the Baroque period. Special consideration is given to the art of Rembrandt and Rubens as well as the development of landscape, portraiture, and genre painting. The class may visit the Metropolitan Museum of Art and the Frick Collection. Students may be required to cover museum admission fees.

Course Rotation: NYC: Spring - Odd years.

ART 211 Art History: Baroque Art in France, Germany, Italy and Spain (3 credits)

Major works of Baroque painting, sculpture, and architecture in France, Germany, Italy, and Spain. Works of art will be placed within the context of 17th century European history. The class may visit the Metropolitan Museum of Art and the Frick Collection.

Course Rotation: NYC: TBA.

ART 212 Nineteenth Century Art (3 credits)

A survey of the major artistic movements of the 19th century. French painting is emphasized and placed in the context of the major intellectual, political, economic and social developments. David, Ingres, Delacroix, Daumier, Monet, and Van Gogh are among the artists discussed. Includes trip to the Metropolitan Museum of Art.

Course Rotation: PLV: Fall - Odd years.

ART 213 Art History: 18th and 19th Century Art (3 credits)

Survey of the development in painting, sculpture, and architecture in Europe during the 18th and 19th centuries. Emphasis will be on the development of style in painting, the changing content, and patronage of works of art, the employment of art as political propaganda by the state and its adversaries, and art as a medium for social satire and commentary. Classes may visit the Metropolitan Museum of Art and the Guggenheim Museum.

Course Rotation: NYC: Fall.

ART 214 Art History: Modern Art (3 credits)

Chronological survey of major movements of modern art in all media, beginning with the school of Post-Impressionists in the late nineteenth century and ending with an overview of prominent contemporary artists. Emphasis is on European and Russian art before World War II and American art after the Armory Show of 1913. Classes may visit the Museum of Modern Art and exhibitions of contemporary art in New York. Students may be required to cover museum admission fees.

Course Rotation: NY: Spring.

ART 215 New York and the Visual Arts (0-3 credits)

This course will introduce students to the painting, sculpture, photography, and installation art of the New York art world. Study of the theory and criticism current in contemporary art will be accompanied by visits to a wide range of museums, galleries, and artists studios.

Course Rotation: Fall and Spring.

ART 216 Art History: American Art (3 credits)

Traces the history of American painting, sculpture, architecture, and the decorative arts from the 17th through the 20th century. Emphasis is on examining the influence of European art and defining the unique qualities of American art in the areas of portraiture, landscape, and history painting. This course includes a visit to the Metropolitan Museum of Art. Students may be required to cover museum admission fees.

Course Rotation: NYC: Spring. PLV: Fall - Even years.

ART 217 Art History: Latin American Art (3 credits)

A survey of the art of Latin America from the pre-colonial cultures of Mexico, Central America, and Peru and their influence on art from the conquest to the early twentieth century.

Course Rotation: NY: Spring.

ART 218 Art History: African Art (3 credits)

Introduction to the visual arts of North, West, and Central Africa, from the Nubians in the Nile Valley to the Yoruba people in Nigeria and the Kuba people in the Democratic Republic of Congo. The course will provide an overview of the range of artistic expression among selected ethnic and cultural groups. Diverse media, including wood, ivory, and stone sculpture, metalwork, ceramics, and textiles, will be studied within their social and cultural contexts. The course will examine the everyday and ceremonial uses of art objects, their religious use such as in rites of passage and initiation, funerary and other rituals, and ancestral cults, as well as the social functions of art objects (including bodily adornment and clothing) as expressions of gender roles, systems of hierarchy, methods of social control, and the power of kingship.

Course Rotation: NY: Fall and Spring.

ART 219 Art History: Clothing and Gesture (3 credits)

This course will present a selective survey of Western Art from Antiquity to the present with a focus on art's social context, the importance of clothing and gesture, and the connections between visual and theater. The course reading will include art historical essays, historical writings on expression and gesture, Renaissance books of manners and Modernist dress manifestos. In addition the class will twice visit New York museum collections (the Frick Collection and the Metropolitan Museum I Costume Institute) to see works of art first hand.

Course Rotation: Fall.

ART 220 Art History: Aspects of Asian Art (3 credits)

This course examines the history of Asian art from India, China, Japan, and Cambodia. Works of art are studied in their social, cultural, and geographical contexts. The class studies the relationships between architecture, painting, and sculpture to the development of Hinduism, Buddhism, and other religious ideologies of Asian culture. Works of art may be studied on a firsthand basis in the Metropolitan Museum of Art. Students may be required to cover museum admission fees.

Course Rotation: NYC: Spring - Even years.

ART 221 Architectural Rendering and Graphics (3 credits)

Instruction in the use of basic tools of mechanical drawing. Introduction to architectural terminology and graphic presentation of plans, elevations, sections, and perspective views of various forms and spaces. Instruction in rendering techniques concentrating on both freehand and mechanical drawing. Several projects will be required.

Course Rotation: PLV: Spring.

ART 222 Color Workshop (3 credits)

This course concentrates on color in art and interior design. Technical and visual attitudes in various media will be explored. Basic and more sophisticated color theories, also pigments and methods of color application will be treated in the studio session.

Course Rotation: NYC: Spring - Odd years.

ART 223 Lighting (3 credits)

An introduction to the elements of lighting in the home and for commercial use. Special effects will be covered, as well as types of lighting equipment used in various areas. Students will also have the opportunity to design their own lighting fixtures.

Course Rotation: PLV: Spring.

ART 224 Hip Hop in Contemporary Art and Design (3 credits)

Hip hop shapes today's visual culture, from magazines, clothing and design, to the art world itself. But what is it? Many of the elements of the culture can be traced back to the early 70's with graffiti on trains, and new forms of street dance, poetry and DJ'ing coming out of The Bronx. An afro-centric street culture became a new language which spoke to the world. Exploding in the 1980's with artists such as Jean Michel Basquiat, Fab 5 Freddy and Keith Haring up to the present with Kehinde Wiley, Rene Cox, Hank Willis Thomas, Sanford Biggers and Luis Gispert, etc., who broke race and class barriers in visual arts around the world, fusing the pop sensibilities of Warhol with radical Afro-America aesthetics of abstract style, repetition and representation. The course will combine lectures, slide shows, video and readings; engaging students in discussion and writing on the class topics.

Course Rotation: Fall, NY

ART 225 Stop Motion Animation (3 credits)

Students in this course produce short films using traditional hands-on approaches to animation. The focus is on generating animations using drawing; collage, and sculpture rather than digital 2D and 3D animation programs. Projects include hand-drawn animations, Claymation, and pixilation (working with actors), with emphasis on skills acquisition and experimentation. Both collaborative and individual animations will be assigned. Historical and contemporary examples introduce each assignment. Students learn to build narratives using storyboards and create films from stills using DSLR cameras. Several animation programs are explored and professional editing software for both video and audio is introduced. No prior art or film experience is required.

Course Rotation: Spring (odd years).

ART 226 Native American Art History (3 credits)

This course is a survey of the Native arts of North America as an interrelated set of cultural and geographic regions. The main regional areas of focus will be the Eastern Woodlands and Mississippian cultures; the Great Plains and Great Basin; the Southwest Pueblo peoples and California and the Pacific Northwest and the Arctic. The course will conclude with modern and contemporary Native Arts of North America. The aesthetics and other ideas contributed by Native Americans hold far more interest than just as counterpoints to Western art. Along with courses in Latin American, Pre-Columbian, Asian/Pacific and African Art, this course addresses the need for a global art history, one that integrates Western visual cultures and thereby enriches and realistically balances the art history curriculum. The visual and intellectual cultures of Indigenous America, before and after 1492, have been crucial factories in the cultural development of post-Conquest America, and the world. Critiquing and contesting the notion of Native American culture as extinct or as a pre-Conquest vestige, this course will take a progressive approach to the study of Native American art as a living tradition with roots deep in the pre-colonial past. It will survey the multiple modes of expression that characterize the vast North American continent. The course will include lectures, discussions, multi-media presentations, and museum trips.

Course Rotation: NYC: Spring; Even Years

ART 230 Ceramics II (3 credits)

Further development of the ceramic techniques taught in Ceramics I. Emphasis is on the design of wheel-thrown forms and the formulation of clay bodies and glazes.

Course Rotation: PLV: Spring - Odd years.

Prerequisites: ART 133 or permission of the Instructor.

ART 231 Environmental and Ecological Art (3 credits)

This course introduces students to Environmental & Ecological Art within studio, lecture and field-work contexts. The class fosters understanding of issues of landscape, Earthworks, Land Art, Environmental Art, and Ecological Art practices. Incorporating two and three dimensional as well as time-based approaches, students develop creative artworks dealing with the environment, ecological systems, sustainability and resilience. Field trips include the Newtown Creek Wastewater Treatment Center and artist George Trakas' adjacent Nature Walk and Smelling Garden; Rooftop Farms or other urban gardens in New York, and endangered waterfront areas of NYC. Students learn examples and theories of Eco/Environmental Art, and conduct research and fieldwork resulting in visual art projects. Pace University is located near the convergence of two rivers with the Atlantic Ocean. Students develop understanding of the natural and built environs of Lower Manhattan, stewardship of this urban habitat is of critical, ethical importance to future sustainability, esp. in relation to climate change. Students develop awareness of the historical New York City environmental landscape: the Lanape Native culture, estuary waters, wildlife, and topography. The course may include presentations by Environmental Scientists and Environmental Studies professionals, and environmental activists. All students are required to keep a journal or sketchbook. Critiques are frequent opportunities to share in an "open-laboratory" art environment. Textbook: Linda Weintraub, *To Life: EcoArt in Pursuit of a Sustainable Planet*, Uni. of Cal. Press, 2012.

Course Rotation: Fall and Spring

ART 233 Public Art in the Urban Context (3 credits)

Public Art in the Urban Context is a civic engagement art course that involves a partnership between the Pace Art Department, the New York Cares organization and the local New York City public schools. In this relationship, the local schools are the “client” and “commission” a site-specific artwork to be designed and produced by the Pace Students in the course. Students will be guided through the design process and work together to meet with the client, research the site and its community, create and present a professional proposal to the client, negotiate changes and design restrictions, create a working schedule, learn to scale their work and prepare the site and produce the work within the time available, and finally document the work to create an artist portfolio.

Course Rotation: NYC: Fall, Spring

ART 234 Clay, Puppet and Object Animation (3 credits)

King Kong, Anomalisa, The Fantastic Mr. Fox, and Wallace and Gromit are familiar commercial examples of this style of animation, which involves sculptural characters acting frame by frame in miniature sets. This course focuses on these traditional stop-motion approaches to 3D animation, including Claymation and related approaches of Object and Puppet animation. A focus on character development and storyboard design prepares students for successful animations. A variety of sculptural materials and construction techniques are introduced, including using movable armatures and working with polymer clays. Instruction is provided in set design and construction, including lighting design for animation. Students learn to use professional capture and editing software and produce both collaborative and individual animations. Historical and contemporary examples are studied in preparation for all assignments. We produce three animations in the course of this class, learning a different approach with each assignment. Narrative structure is discussed and developed through storyboards. Scripting, lighting, and set design are studied, as are legal concerns such as permits, release forms, and copyright laws. Students will learn to use two types of capture software, and how to edit and add audio and titles in Final Cut Pro or Premiere. Cameras, iPads, computers, and editing software are available for your use through the Art Department, as are basic sculpture tools. A limited number of tripods and photographic lighting kits are also available for checkout. Most art supplies and materials need to be purchased by individual students: for most collaborative projects, students split the cost of supplies so that the cost per student is reasonable.

Course Rotation: NY: Spring

ART 235 Traditional Animation (3 credits)

Students in this course study a range of drawing and collage techniques and how to adapt them for animation. Disney's Twelve Principles of Animation are introduced. Students develop drawing skills and an awareness of drawing styles through a series of preliminary assignments. Basic training in figure drawing is provided. Perspective, natural movement, line of action, and personal approaches to style are covered. Animations are completed using industry standard capture and editing software. Students complete the class with their own hand drawn and cut-out animations.

ART 238 Painting in Watercolor II (3 credits)

ART 238 is a second course in watercolor painting, including materials, techniques, and an overview of the diverse cultural traditions of this vulnerable art medium. This class will consist of in-class painting assignments, group discussion, field trips, slide lectures, and weekly homework assignments emphasizing skill building and creative exploration. Advanced projects will use water-based media including watercolor and gouache. A continuation of ART 138, students in this section will continue to develop their skills and increase their technical knowledge of the medium. Assignments will be more open and self-directed to encourage students to evolve a more personal approach technically, formally and conceptually. An individual midterm critique will be provided to students to help develop strengths and address weaknesses.

Course Rotation: TBA.

Prerequisites: ART 138 or permission of instructor.

ART 241 Drawing II (3 credits)

This course is designed for students with previously acquired basic drawing skills; it introduces concepts of style, composition through both traditional and experimental approaches. Using a variety of media, drawings are developed based on selected themes. Students work on sketches, studies, and sustained compositions.

Course Rotation: PLV: Fall.

ART 243 Graphic Novel (3 credits)

Each student creates a section of a graphic novel inspired by specific places, characters and vents. These are determined by the class participants and the instructor. Examples of graphic novels and other narrative and text-based art forms are studied. Through semester-long projects, students develop their drawings, design, and storytelling skills.

Course Rotation: Spring, NYC

ART 245 Art History: History of Photography (3 credits)

Studies of the history of photography in the 19th and 20th centuries with an emphasis on the major stylistic and aesthetic movements in the field. The invention and development of various photographic techniques as well as the careers of major American and European photographers are covered. The relationship between photography and other art media, such as painting, is also addressed. Classes may visit the International Center of Photography and the Museum of Modern Art. Students may be required to cover museum admission fees.

Course Rotation: NYC: Fall.

ART 247 Painting II (3 credits)

An advanced course in painting. The human figure will be a central theme: students will be encouraged to plan and complete works in contemporary idioms and media.

Course Rotation: PLV: Fall.

ART 253 Photography II: Black and White (3 credits)

This course introduces students to advanced techniques in the management of photographic images from developing a concept through control processes of lighting, composing, and exposing negatives to application of advanced manipulations in the darkroom and final presentation of photographic artwork. Students will be encouraged to develop personal areas of interest in photographic art. Emphasis will be placed on development of thematic portfolios.

Course Rotation: NYC: TBA.

Prerequisites: ART 153 or ART 159 or permission of Instructor. A 35mm camera capable of manual control of F/Stop and shutter speed.

ART 254 Shooting the Word: The Photographer's Eye. The Novelist's Vision (3 credits)

In this class, you are a photographer. You create images focusing on similarities between the photographers creative process related to a novelists vision. You take photographs in order to understand and apply the process of photography as a vehicle for personal expression. You examine the relationship between the self and identity, the individual and community engagement, global culture and redefining identities, and the evolving practice of the role of the image maker in today's society.

Course Rotation: Spring.

ART 255 Documentary Photography (3 credits)

This course will introduce students to the practice and ideas of documentary photography through the completion of a project or series of related photographs. Students will be introduced to digital and analogue processes in color and B&W, and to trends and ideas in contemporary and historical documentary work. With greater skills and context in place, students will begin to put together a photographic project. They will be required to present work for critique every other week, complete a midterm presentation and project proposals, and complete the corresponding body of work self-published in published form.

Course Rotation: NYC; Fall

ART 260 Illustration (3 credits)

Course Rotation: TBA.

ART 262 ICP: Daily Practice: The Photo Journal (3 credits)

In this supervised practicum, students will have the chance to study with a professional photographer on the faculty of the International Center of Photography, one of the foremost professional photography schools in the United States. In this course, students photograph every day, regardless of other commitments, and keep a visual diary of the experience. The practice of making photographs daily helps us to become more engaged with the feelings, ideas, and events that motivate our photography and inspire creative habits. The goal of this course is to establish the sustained commitment to photography at the heart of professional practice. Participants share pictures they make each week with the group and our online review of student work provides individual guidance, encouragement, and refinement of technique. Everyone's participation is essential to developing a meaningful exchange of ideas. This course meets by synchronous zoom session at the time listed in the course catalog. In addition to attending all class sessions, students are required to complete a writing project about photographic practice under the supervision of the Pace ICP Coordinator.

Course Rotation: Fall and Spring

ART 263 International Center for Photography: Fashion Photography (3 credits)

In this supervised practicum, students will have the chance to study with a professional photographer on the faculty of the International Center of Photography, one of the foremost professional photography schools in the United States. Throughout the history of photography, portraitists have looked to fashion for inspiration, and fashion has turned to the camera for edification. Both disciplines begin with an idea about how to represent the model in space. Elements of wardrobe, makeup, attitude, and personal style add dimensions to an image that are both coded and revealed. In this class, students explore the nexus of fashion and portraiture by examining our inspiration as photographers and our desires as viewers. The class will include weekly lighting workshops, slide presentations on the history of fashion photography, and student critiques with particular attention to decisions made regarding lighting, art direction, and narrative themes. This course takes place at the School of the International Center of Photography on the Lower East Side of Manhattan. In addition to attending all class sessions, students are required to complete a writing project about photographic practice under the supervision of the Pace ICP Coordinator.

Course Rotation: NYC: Fall, Spring

ART 264 Typography (3 credits)

The study of classic typefaces of this century. Procedures for the design and layout of all sorts of copy will be practiced; this will include the use of hot and cold type and manual typesetting. Particular attention will be given to the appropriateness of design and legibility of body, display, and title faces. Students will be encouraged to produce both standard and innovative layouts for all visual media.

Course Rotation: PLV: Spring - Odd years.

ART 266 International Center for Photography: Fundamentals of Studio Lighting (3 credits)

In this supervised practicum, students will have the chance to study with a professional photographer on the faculty of the International Center of Photography, one of the foremost professional photography schools in the United States. This course focuses on practical applications of studio lighting for portraiture. In-class demonstrations cover the unique properties and use of strobe equipment and continuous light sources, such as tungsten and LED lighting, as well as diffusers, specialized reflectors, focusing elements, and light shapers. Students learn to consider the direction of light, proper exposure, and lighting's effect on contrast and color balance. We also examine the properties of various lighting conditions and color temperature, including mixing daylight with artificial lighting. This course takes place at the School of the International Center of Photography on the Lower East Side of Manhattan. In addition to attending all class sessions, students are required to complete a writing project about photographic practice under the supervision of the Pace ICP Coordinator.

Course Rotation: Fall and Spring

Prerequisites: As listed or with permission of the ICP Coordinator.

ART 267 Printmaking II (3 credits)

Students continue learning the printmaking processes introduced in Printmaking I, with more advanced assignments, greater creative freedom, and projects incorporating new technology, including a laser cutter.

Course Rotation: TBA.

Prerequisites: ART 158, ART 167 or permission of instructor.

ART 268 International Center for Photography: Portrait Photography (3 credits)

In this supervised practicum, students will have the chance to study with a professional photographer on the faculty of the International Center of Photography, one of the foremost professional photography schools in the United States. Students in this course are exposed to various mediums working with portraiture and the figure such as sculpture, painting and photography. The book "Glitch Feminism," by Legacy Russell is a main source of inspiration and reference as a lead to understanding identity, feminism, the "glitch", the future and how that can inform how we look at and make images—specifically portraits. Students will push their understanding of portraits by using other mediums such as collage and painting to engage with the malleability of photography and the influence of texts to understand what it means to be human in our current climate and how to represent that in their own thoughtful way. This course takes place at the School of the International Center of Photography on the Lower East Side of Manhattan. In addition to attending all class sessions, students are required to complete a writing project about photographic practice under the supervision of the Pace ICP Coordinator.

Course Rotation: Fall and Spring

Prerequisites: As listed or with permission of the ICP Coordinator.

ART 269 International Center for Photography: Alternative Process Photography (3 credits)

In this supervised practicum, students will have the chance to study with a professional photographer on the faculty of the International Center of Photography, one of the foremost professional photography schools in the United States. Alternative photographic processes made by hand-coating artist's papers with light sensitive emulsion have been in use since the 19th century and are widely used today by contemporary artists and photographers. This course offers students a chance to "step outside the box" creatively from other print processes and learn about the expressive and painterly aspects of alternative photographic methods; each print is unique. In addition, the use of digital negatives offers the best of both worlds, combining modern-day technology with handmade historic printing methods. Class lectures, demonstrations, and lab time will focus on specific topics: digital negatives, cyanotypes plus toning, van dyke brown, palladium, and layering color gum bichromate pigments. Students are welcome to explore and experiment with the processes and make them fully their own. Familiarity with Photoshop is required for this course, particularly an understanding of Adjustment Layers. This course takes place at the School of the International Center of Photography on the Lower East Side of Manhattan. In addition to attending all class sessions, students are required to complete a writing project about photographic practice under the supervision of the Pace ICP Coordinator. This class meets at Pace for four weeks and at the International Center for Photography, (1114 Avenue of the Americas at 43rd Street) for ten weeks.

Course Rotation: Fall and Spring

ART 270 ICP: The Power of the Color Image: Exploring Color in and out of the Darkroom (3 credits)

Ultimately, the best way to learn to see color in photography is by printing in the color darkroom. This course teaches students how to unleash the power of color in their work by integrating instruction in aesthetics and technique into printing sessions, class critiques, and lectures on color photography. By printing negatives on ICP's automated Kreonite processor, students have an opportunity to learn how color works in a hands-on way that just isn't possible in the digital lab. Many photographers prefer printing from color negative film because of its flexibility, simplicity, and the superb reproduction of both subtle and brilliant colors. Students who move on to digital image making later always find they have an advantage over those who have never made an analog C print.

Course Rotation: Fall

ART 272 ICP: Fine Art Digital Printing (3 credits)

In this supervised practicum, students will have the chance to study with a professional photographer on the faculty of the International Center of Photography, one of the foremost professional photography schools in the United States. In this course students develop the skills to realize their creative photographic vision in printed form. Students learn a streamlined digital printing workflow, building the foundation they need to produce fine prints on a variety of papers. Topics include: pre-visualization; effective methods for using Lightroom Classic and Photoshop software for printing; scanning negatives and techniques for using Photoshop to achieve local adjustments. Image resolution, resizing, sharpening, ICC profiles and paper choices will also be discussed. Class critiques and hands on work in the Digital Media Lab reinforce essential concepts and printing skills. This course takes place at the School of the International Center of Photography on the Lower East Side of Manhattan. In addition to attending all class sessions, students are required to complete a writing project about photographic practice under the supervision of the Pace ICP Coordinator.

Course Rotation: NYC: Fall and Spring

Prerequisites: Listed prerequisite courses or permission of the ICP Coordinator.

ART 273 Graphic Design 2 (3 credits)

This course builds on the principles and skills of Graphic Design 1 to further develop creative processes of designing for individuals or organizations. The class will explore the development of a fictional client's visual concepts and aesthetics through logo or identity design, typography, package design, and page layout for print and web based formats. Each stage of this process will be advanced through visual research, program skills, proposals, presentation and critique. Students will work at times in groups to experience a team process of creative decision-making. The course will give the student a real world sense of the professional graphic design environment.

Course Rotation: NYC: Fall

ART 277 ICP: Photographic Faces, Masks, and Narrative (3 credits)

In this supervised practicum, students will have the chance to study with a professional photographer on the faculty of the International Center of Photography, one of the foremost professional photography schools in the United States. This class looks closely at expression, gesture, performance and narrative in self-portraiture. Through weekly assignments, students experiment with different approaches to self-portraiture, become more comfortable in front of the camera lens, and develop a visual language to express themselves through their photographic work. This course is currently taught online synchronous with students required to attend zoom sessions at the time listed in the course catalog. In addition to attending all class sessions, students are required to complete a writing project about photographic practice under the supervision of the Pace ICP Coordinator.

Course Rotation: NYC: Fall & Spring

ART 280 3D Games and Worlds (3 credits)

This course will introduce students to the fundamentals of creating virtual three-dimensional objects, sculptural spaces, games and worlds. We will cover introductions to 3D Modeling, Animation and VR (Virtual Reality). The class will learn how to employ a workflow from 3D modeling application to a real-time game engine designed to create a variety of virtual experiences ranging from the artistic to basic game play. 3D sculpting, character development, simple scripting, navigation and storytelling will be learned and explored throughout the class. Students will have access to VR workstations and equipment for testing and presenting their work. This is a beginning course for students who would like to experience the creative 3D construction and immersive media that entices many newcomers to the potential of virtual art worlds and game development.

Course Rotation: NYC: Spring

ART 283 Live Art - Performance, the Body, and the Camera (3 credits)

This course provides an introduction to "Live" or Performance art as it developed in a visual arts tradition. Students discuss the crossover with other performing arts such as theater, dance, and music; examine international and historic performance practices; and explore the influence of new media. Students become acquainted with various issues relevant to performance art including live-ness, audience, performance in everyday life, identity politics, performance for the camera, documentation, folk traditions and ritual, intervention, endurance, public space, relational aesthetics, community activism, and participation. Students develop, perform, and document individual and collaborative works, and attend performance art events. This course introduces student's to professional practices through visits to artist's studios, attendance at gallery exhibitions, and attendance at lectures by professional artist outside of class time.

Course Rotation: NY: Fall, odd years.

ART 285 Video Animation (3 credits)

Students learn principles of animation for video and create their own projects using video animation software. The course includes skill-building exercises in storyboards, digital drawing, greenscreen, compositing, tracking, rotoscoping, typography, video, sound, and 3D objects. Students with experience in other art media like drawing and sculpture may also wish to animate these objects through video.

Course Rotation: NY: Fall.

ART 286 Design for the Internet (3 credits)

This course provides students with basic skills with which to design and code their own websites on the Macintosh platform. Focus is on the construction and design of screen interaction and navigation, and design for media-specific limitations. Instruction includes basic xHTML, and CSS structure, text, graphics and animation-introducing applications for the production of those various elements as well as their particular challenges. Students acquire good design and visual communication skills, through pre-production and classroom discussion. Students endeavor to attend lectures by professional digital artists outside of class time, to provide inspiration and knowledge about the digital arts.

Prerequisites: ART 186 or permission of Instructor.

ART 287 Digital Design II (3 credits)

The focus will be on creating artwork and design with digital imaging software, Adobe Photoshop and Image Ready. Advanced techniques will be covered, emphasizing the creative process and conceptual thinking. Evaluation will be based on technical accomplishment and strong visual design, and students will be guided through self-evaluation and group critiques.

Course Rotation: NYC: Fall - Odd years and Spring - Even years. PLV: Fall - Even years and Spring - Odd years. NYC: Fall, Spring.

ART 288 Mobile Media: City as Screen (3 credits)

Imagine the city is a canvas and your phone is a window into the new dimension. This class is an introduction to the events, images, sound, video and 3-D objects that are accessed on location around New York City using Google maps, GPS media and augmented reality. The course explores the potential of maps to build spatial imagery and narratives. Students learn digital concepts and techniques to produce and position media online, viewable on mobile devices such as smartphones and iPads. The course includes outdoor activities, group projects, as well as reading on the subject. Course Fee: Will cover the continuing upgrade and the purchase of new software programs associated with the course. Currently these are Adobe Creative Cloud, Final Cut Pro X, and Layer Augmented Reality and Blippar Developer accounts.

Course Rotation: NY: Spring

ART 295 Art History Seminar II (3 credits)

Course Rotation: TBA.

ART 296G Topic: Advanced Figure Drawing (3 credits)

Course Rotation: TBA.

ART 296J Topics in Painting: The Human Figure (3 credits)

Working primarily from life, students learn to paint the human figure. Formal considerations such as proportion, volume, composition, and representing skin color and translucency are covered, as is the expressive potential of the human subject.

ART 296S Topic: Visual Literacy (3 credits)

This course initiates a process of discovery into the ways we as a society communicate our beliefs and values through the artifacts we make. We will focus on understanding modes of visual language, descriptive processes, and knowledge of contemporary and historical works and issues. Topics will include: the influence of the computer and computer generated imagery, mythologies from different cultures and their shared imagery, social responsibility of the consumer in a world of image and branding, and the believability of photographs and contemporary media.

ART 296X Video Animation (3 credits)

This course will introduce students to the principles of animation using various software applications including Adobe Premiere and Macromedia Flash. The timeline sound, rotoscoping, scanning, masking, storyboards, moving text, the camera, and effects are among the subjects covered. Students will create narrative and experimental works, publishing them on DVD. Note: Access to a digital video camera is helpful but not required.

Course Rotation: TBA.

ART 297T Drawing and Painting on Site (3 credits)

Students work outside the studio from direct observation. Different methods and approaches are used to explore the wide-ranging possibilities of plein-air drawing and painting. Invention and unique responses are encouraged. Sites may include Central Park, City Hall Park, Grand Central Station, public libraries, museums and galleries, subways, and locations on campus. NOTE: There is no course fee but students will be responsible for subway and bus fare as well as any museum entrance fees.

Course Rotation: NY:Fall

ART 297U Casting and Mold Making (3 credits)

An in depth study of casting and mold making. This course will cover waste molds as well as re-usable multiple part molds made using a range of materials and processes. Body casting, materials, and the use of multiples will be used to investigate content and visual language in sculpture.

Course Rotation: NY:Fall

ART 297X Large Format Photography (3 credits)

This course will introduce the concepts and techniques that are inherent to the large format camera. Class projects and weekly assignments, designed to serve individual interests, will introduce basic controls and camera movements. The view camera's unique capability to exercise an extraordinary amount of control over the image and its strength as a tool for visualizing will be emphasized as a critical aspect of the student's perceptions, interests and creative expression. Demonstrations and hands on practice during class sessions will prepare students for weekly shooting projects. The primary focus of this class will be upon student personal work.

Course Rotation: NYC: Fall

ART 298 Documentary Film and Video Production (3 credits)

Course Rotation: NY: Spring.

ART 298D Topic: French Art: From the Middle Ages to Modern Times (3 credits)

This course offers a diversified and comprehensive overview of the fine arts, architecture, culture, customs, history, and language of France from the Middle Ages to the present. Within an historical framework, students are introduced to important artists, monuments, styles, movements, and trends that have shaped one of the richest cultures of the Western heritage. Course includes a visit to the Metropolitan Museum of Art.

Course Rotation: NYC and PLV: Spring.

ART 298H Topic: ICP Photography I in Color (3 credits)

This course is for beginners seeking an introduction to both camera handling and basic darkroom techniques through color photography. Topics include camera operation, principles of exposure, film development, printing, and picture content. Students experiment with various lighting conditions using both color negative and slide films. Weekly assignments and lectures on historical and contemporary artwork explore the technical and aesthetic possibilities of color photography. The majority of class time is devoted to working in the darkroom and building printing techniques. In addition to attending all class sessions, students are required to attend three lectures or exhibitions at ICP and write three 2-page double-spaced typewritten response/review papers and turn these in to the Pace ICP Coordinator.

Course Rotation: Fall

ART 298J Topic: The New Landscape: An Individual Focus (3 credits)

Rural, urban, imagined, constructed, interior, aerial-in this individualized course, students define and further develop their personal vision of the landscape. Through weekly presentations, we examine images that challenge traditional notions of the genre, offering diverse ideas using atypical vantage points. Discussion themes include the creative process, personal expression, contemporary trends, and using the camera as an instrument of discovery and communication. The emphasis is on weekly critiques and building a final project. In addition to attending all class sessions, students are required to attend three lectures or exhibitions at ICP and write three 2-page double-spaced typewritten response/review papers and turn these in to the Pace ICP Coordinator.

Course Rotation: Fall

ART 298K Topic: ICP Power of the Color Image: Exploring Color in and out of the Darkroom (3 credits)

Ultimately, the best way to learn to see color in photography is by printing in the color darkroom. This course teaches students how to unleash the power of color in their work by integrating instruction in aesthetics and technique into printing sessions, class critiques, and lectures on color photography. By printing negatives on ICP's automated Kreonite processor, students have an opportunity to learn how color works in a hands-on way that just isn't possible in the digital lab. Many photographers prefer printing from color negative film because of its flexibility, simplicity, and the superb reproduction of both subtle and brilliant colors. Students who move on to digital image making later always find they have an advantage over those who have never made an analog C print. In addition to attending all class sessions, students are required to attend three lectures or exhibitions at ICP and write three 2-page double-spaced typewritten response/review papers and turn these in to the Pace ICP Coordinator.

Course Rotation: Fall

ART 298M Topic: ICP Fashion Photography (3 credits)

Throughout the history of photography, portraitists have looked to fashion for inspiration and fashion has turned to the camera for edification. Both disciplines begin with an idea about how to represent the model in space. Elements of wardrobe, makeup, attitude and personal style are signifiers that are both coded and revealed. Fashion images catalog shifting aspirations around consumerism, body image, celebrity, sexuality, gender expression, pop culture, and rebellion. In this class, we will explore the nexus of fashion and portraiture by going to the source of our inspiration as photographers and our desire as viewers. Slide lectures will incorporate a history of fashion photography with contemporary topics, including the rapidly changing modes of distribution from print to online media. In addition, we will work in the studio each week to develop lighting techniques, art direction, ease with models, and creative themes. Students will complete photographic projects in still media and present work through in-class critiques. In addition to attending all class sessions, students are required to attend three lectures or exhibitions at ICP and write three 2-page papers in response and submit these to the ICP Coordinator.

Prerequisites: Art 153 or Art 196J or Art 350 A or permission of the ICP Coordinator

ART 298R Modern and Contemporary African Art (3 credits)

A study of Modern and Contemporary art in Africa from the 1950s to the present. Works in diverse media will be studied within the context of the rapidly changing social and political history of developing African nations. The relationships between art and the struggles to become self-governing modern nation-states as well as the exchange between African art and Western Modern and Contemporary art will be studied.

Course Rotation: NYC; Spring Even Years

ART 298T Introduction to Packaging Design (3 credits)

This course introduces the creative discipline of packaging design. Students will analyze and solve package design problems relating to branding, form, material and production constraints using both traditional art techniques and digital technologies. They will address structural challenges through hands-on work with paper and other materials. They will learn to fabricate high quality mock-ups (comps) of their designs, and to document their work. Students will also learn to present and discuss their work, and to provide constructive feedback to others, during class critiques.

Course Rotation: NYC: Fall, Spring.

ART 298Z Topic: Risograph Workshop (3 credits)

This course explores the risograph printing method and the opportunities it allows for graphic design experimentation and production. Students will investigate the Risograph process as an experimental medium, while balancing technical print production concerns such as color separation, pagination, bookbinding, and finishing. Classes will balance lectures, discussions, critiques and student presentations of design work.

Course Rotation: NYC: Fall

ART 301 Professional Practices for Creative Practitioners (3 credits)

How does a creative professional find and maintain work? What can a student do to prepare? What are common expectations and what can be negotiated? How is value determined and rewarded? These are a few of the questions students ask as they begin to think of their lives beyond graduation. This is an upper level course for art majors and others preparing to graduate and enter the job market.. This course will consist of in class workshops and lectures, several guest lecturers, weekly reading and writing assignments and a final multi-platform portfolio and resume presentation designed to help each student gather the conceptual and practical tools they need to clarify and then realize their own creative employment goals.

Course Rotation: Spring

ART 304 Interior Design 2 (3 credits)

Plan and elevation and perspective renderings of interior spaces, as well as consideration of accessories, window treatment, floor coverings, and lighting for contemporary living. Some three-dimensional model-building will be included.

Course Rotation: PLV: Fall.

ART 305 Presentation Techniques Residential (3 credits)

Plan and elevation and perspective renderings of residential spaces. Emphasis on materials used in the home. Guest speakers from the profession will give the student alternate perspectives on creative design.

Course Rotation: PLV: Spring.

ART 306 Project Studio A (3 credits)

The Project Studio is an interdisciplinary studio course for intermediate and advanced students. Students develop a self-directed project in the medium of their choice, with the oversight of the instructor. Students may work in drawing, painting, digital, photography, sculpture or any combination that compliments the proposed project. Experimentation and a personal approach to the chosen medium are encouraged. The instructor works with each student individually to define and develop a challenging project, providing visual references and relevant readings. Group and individual critiques provide a critical framework. A visiting critic is invited to view and discuss student work. ART 306 and ART 307 and ART 308 may be taken alternate semesters.

Prerequisites: A minimum of 3 studio Art courses or permission of instructor.

ART 307 Project Studio B (3 credits)

The Project Studio is an interdisciplinary studio course for intermediate and advanced students. Students develop a self-directed project in the medium of their choice, with the oversight of the instructor. Students may work in drawing, painting, digital, photography, sculpture or any combination that complements the proposed project. Experimentation and a personal approach to the chosen medium are encouraged. The instructor works with each student individually to define and develop a challenging project, providing visual references and relevant readings. Group and individual critiques provide a critical framework. A visiting critic is invited to view and discuss student work. Project Studio may be taken up to three times for credit under separate course numbers: ART 306-Fall New York, Spring Pleasantville; ART 307- Spring New York, Fall Pleasantville; or ART 308 as a tutorial either semester in New York and Pleasantville.

Course Rotation: NY, Spring: PLV, Fall

Prerequisites: A minimum of 3 previous studio Art courses or permission of instructor. Course Equivalents: ART 297A, ART 296H and ART 296Y.

ART 330 Sculpture II (3 credits)

Designed to broaden the techniques and concepts learned in Sculpture I, this course will introduce students to new materials and to problems involving the three-dimensional rendering of the human form. Modern and contemporary sculpture will provide a background to these studies.

Course Rotation: PLV: Spring - Odd years.

Prerequisites: ART 130 or permission of instructor.

ART 341 Life Drawing and Anatomy (3 credits)

An advanced course in drawing which concentrates on the human figure and composition. Skeletal structure and surface anatomy are studied. Students explore a variety of materials and techniques. Compositional problems are emphasized.

Course Rotation: PLV: Spring.

Prerequisites: ART 140 or permission of the Instructor.

ART 342 Advanced Drawing (3 credits)

Open to students who have had previous experience drawing the live human figure, this course will permit students to concentrate on advanced level problems involving scale, appropriate media, deliberate exaggeration and distortion, etc. The study of surface anatomy begun in ART 241 will be continued.

Course Rotation: PLV: Spring - Even years.

Prerequisites: ART 241 or Permission Of Department Chairperson.

ART 343 Painting III (3 credits)

Students will further develop skills and increase technical knowledge of the medium. Assignments will be open-ended and self-directed to encourage students to evolve a more personal approach technically, formally, and conceptually.

Course Rotation: PLV: Spring - Odd years.

Prerequisites: ART 247 or permission of instructor.

ART 350B Topic: Animators' Studio (3 credits)

The Animators' Studio affords students with prior experience in stop motion animation the opportunity to develop more advanced skills in the medium. The focus is on producing a single self-directed animation from conception to finished film in the course of the semester. Students choose among approaches including hand drawn, traditional cel animation, cut-out animation, animations using live actors (Pixilation), Claymation/puppet animation, or combinations of the above. A survey of commercial and independent films highlights professional animation practices. The use of stop motion capture software is covered in depth, combined with an analysis of filming techniques. Instruction is provided in more complex video and audio editing including compositing, Rotoscopy, masking, and timing for voice overs. Access to all basic equipment and software is provided.

Course Rotation: NYC; Fall Even Years

ART 351 Digital Photography 2 (3 credits)

This class explores the fundamental techniques and applications of capturing, manipulating and outputting digital photographic images. Class covers basic photographic principles, color theory and elements of composition. For the processing and enhancement of digital photographs, students learn the basics of Photoshop. Critical and creative thinking are developed through the exercise of aesthetic judgment and reflective writing.

Course Rotation: Fall, Spring

Prerequisites: ART 153 or consent of instructor. It is recommended that students have their own digital cameras with adjustable exposure and focus.

ART 356 Photography III: Experimental Photography (3 credits)

Students explore the work of artists whose images deviate from traditional notions of the nature of the photograph. Aesthetic rationale behind specific techniques of image manipulation is studied. Students use combined media in the execution of a series of assigned photographic projects.

Course Rotation: NYC & PLV: Spring - Odd years.

Prerequisites: ART 228, ART 252 or ART 253 or permission of the Instructor. A 35mm camera capable of manual control F/stop and shutter speeds.

ART 360 Video II (3 credits)

Students will expand their video production skills while increasing their knowledge of the history and theory of video. This course builds on a fundamental knowledge of production and postproduction in video to develop the student's interest in the medium from both individual and collaborative perspectives. Shorter assignments expand on individual students skills in camerawork, sound, and editing. Green screen capture and composite video editing are introduced. The rich potential of visual storytelling is explored through longer projects which require student collaboration and a film crew model. Throughout the course, historical precedents and contemporary examples are viewed and considered as possible avenues for student exploration. Note: Access to a digital video camera is helpful but not required; students have access to Art Dept equipment.

Course Rotation: NYC: Spring and Summer

ART 361 Narrative Video and Film (3 credits)

Expanding on the concepts and techniques introduced in Video I, this course will explore the nature and purpose of narrative video and film through exercises, screenings and several group projects. Students will be introduced to strategies of narrative –both conventional and experimental, through the use of storyboards and treatments, plot development, voice overs, pacing, suspension of disbelief, and denouement. Students will engage with a range of approaches to the short narrative found in video and film, such as biography, parallel narratives, conceptual video, mocumentary, parody, and the remake.

Course Rotation: NYC: Spring.

Prerequisites: Permission of instructor required to register.

ART 380 Computer Illustration (3 credits)

Students learn how to create artwork-using vector based drawing software. Emphasis will be placed on creative problem solving, design concepts, and critical thinking as well as technical virtuosity.

Course Rotation: NYC and PLV: Fall - Odd years.

ART 385 Creative Coding (3 credits)

Through an exploration of the fundamentals of computer programming, students will relate software concepts to principles of visual form, motion, animation, and interactivity. By generating and manipulating images with code, students will be introduced to the technical aspects and concepts that are found in most programming languages. The ability to read and write code and use your own software as an expressive tool for making art is a fundamental first step to understanding more advanced applications like computer vision, interactive environments, and game development. The main content of this course will be hands on demonstrations and discussions about the meaning and importance of software art as a medium. No coding experience necessary.

Course Rotation: Spring; NYC

Prerequisites: ART 186/ART 285 or permission of instructor.

ART 390 Art Studio, Museum or Gallery Internship (3 credits)

Internships in museums, art galleries, auction houses, design departments, and art studios are coordinated by the art history and studio art faculty. The goal of the internship is to provide pre-professional experience working inside a cultural institution, art-related business, or studio. The internship must be approved and supervised by Fine Arts faculty advisor. The student must submit written reports in addition to completing the work portion of the internship.

Course Rotation: Fall and Spring.

Prerequisites: Permission of Department Chair. Revised

ART 395 Independent Study in Art and Design (1-9 credits)

With the approval of the supervising faculty member, the department chairperson, and the academic dean, students may select an area of study in art history or studio art that is not included in regular course offerings. For art history, an extensive research paper is required. For studio art, a work or series of works that extend beyond current course offerings is required.

Course Rotation: NYC: Fall, Spring, and Summer. PLV: Fall and Spring.

Prerequisites: Junior standing, a minimum CQPA of 3.00 and permission of Department Chairperson required.

ART 427 Visual Communication and Technology (3 credits)

This course is designed to give students an understanding of the principles and theory of Visual Communication as it applies to technology.

When completed, students will be able to brand websites and applications. Students will explore the meaning of Visual Design, how to identify its application, develop their own creative process, how to be a practitioner of design including having the appropriate vocabulary, to articulate ideas and concepts in a critique setting, analyze/critique Visual Design using sound principles, and iterate upon original work to bring it professional standards.

Course Rotation: NYC; Spring

ART 480 Art History Seminar I (3 credits)

Advanced-level seminars required for all art history majors. Open to students in other departments with permission of the instructor. May include visits to museums and galleries to see works of art related to the seminar topic. Seminar topics vary from year to year and include lectures and discussions of readings, as well as student presentations of research projects.

Course Rotation: NYC: Fall.

Prerequisites: Permission of Instructor.

ART 481 Art History Seminar II (3 credits)

Critical analysis of a wide range of approaches and methodologies that have been applied to the history of art. Seminar discussions will focus on a set of readings that are arranged to illuminate the chronological development of writing on art and that cover a broad range of art topics from Roman to Gothic to Modern Abstract Expressionism. The authors studied may be artists, historians, Marxists, Feminists, art historians, and art critics. Required for all art history majors on the New York campus. Enrollment with permission of the instructor only.

Course Rotation: NYC: Spring.

Prerequisites: Permission of instructor required.

ART 482 Honors Research Project (3 credits)

Students may participate in the Pace University Honors Program and complete a major in art history. Under the supervision of a faculty member in art history and with the approval of the Campus Honors Committee, the students may engage in an independent research project during the senior year. To be eligible for the program, the student's cumulative scholastic index must meet these standards of the Honors Program. Students are encouraged to enter the Honors Program by their junior year.

Course Rotation: NYC: Fall and Spring.

Prerequisites: Permission of the Director of Honors College required.
