

NURSING (NUR)

NUR 246 Healing with Complementary and Alternative Therapies (3 credits)

This course focuses on the process of becoming a healer and the use of complementary alternative therapies in nursing. Attitudes, philosophies, theories, and paradigms, and research evidence of healing and complementary therapies will be examined. Diverse therapies including guided imagery, meditation, music, massage, and bodywork, acupuncture, and reflexology will be explored, demonstrated, and practiced.

Prerequisites: This course does not have a prerequisite.

NUR 247 Pathophysiology and the Entertainment Media (3 credits)

This course will focus on analysis of media portrayal of disease states. The media portrayal of disease manifestations will be assessed and contrasted to evidence based disease manifestations and clinical experience. The effect of accurate and inaccurate disease portrayal on health care, health policy and the general public will be analyzed.

Course Rotation: NY and PL: Spring and Summer.

Prerequisites: BIO 152 and CHE 113 and BIO 153 with minimum grades of b-.

NUR 290F Topics in Nursing: Nurses and History: Leading the Way To Health (3 credits)

This course examines the lives of nursing pioneers who changed the nature of health care practice in the United States during the late 19th and early 20th century. The pressing social, legal, political, and educational issues that nurses addressed in their quest to provide access to care are examined. Women's suffrage, nursing licensure, public image of nursing, and control of practice are studied. Trips are taken to the Tenement Museum and the Henry Street Settlement in New York City.

Prerequisites: This course does not have a prerequisite.

NUR 305D Recitation for Level Three Nursing (0 credits)

Recitation to accompany level three nursing courses.

Course Rotation: PL: Fall and Spring.

Prerequisites: This course does not have a prerequisite.

NUR 395 Independent Study in Nursing (0-6 credits)

With the approval of the appropriate faculty member, the department chair, and the academic dean, students select a topic for guided study or field studies that are not included in the regular course offerings. The student meets regularly with the faculty member to review progress. A paper must also be submitted. Projects involving a clinical experience require a lab fee and health clearance.

Course Rotation: Fall, Spring, and Summer.

Prerequisites: This course does not have a prerequisite.
