ONLINE STUDENT ORIENTATION IP (OSI)

OSI 010 Online Orientation (0 credits)
This one- week course is designed to prepare students to effectively participate in an asynchronous learning environment. The student will receive an introduction to Blackboard, the software Pace University uses to deliver courses for this online program, and essential Internet concepts. All new iPace students.

OSI 101 Lubin iPace Online Student Seminar (1 credits)
This two-week seminar course is designed to prepare new Lubin iPace students to effectively participate in an asynchronous learning environment. Students receive an introduction to Blackboard, the software Pace University uses to deliver courses for the iPace online program. In addition, students will learn essential Internet concepts, explore the process of online learning, and be introduced to the Lubin School of Business. Students will also complete at least two writing assignments to demonstrate their abilities in analysis, critical thinking and writing. All students are required to successfully complete this online seminar before regular classes begin.
Course Rotation: Fall and Spring.
