

ACADEMIC ADVISEMENT NURSING

An academic advisor is assigned to each student upon matriculation into the nursing program. Students should review the list of advisors posted on the Classes LSN Undergraduate Community site for the name of their advisor.

It is the student's responsibility to seek an academic advisor and guidance throughout the program and to plan for meeting the prerequisites of the nursing courses. Students must meet with their advisors each semester prior to course registration. A "hold" will be placed on the registration status of RN4 students and they will not be permitted to register until they meet with their advisor.
