

ACCELERATED NURSING, BS (ABS)

Campus: NYC, Westchester

The Accelerated Bachelor of Science in Nursing (ABS) program is a three-semester, 51-credit program, that provides a specifically designed accelerated curriculum for non-nurse college graduates (U.S. bachelor's degree or its equivalent) who wish to study nursing in a first professional degree program. The Lienhard School of Nursing has long been a leader in second-degree education for non-nursing college graduates and has offered an accelerated nursing program in Pleasantville since 1984. Acceleration is possible for the ABS program by giving recognition to previous baccalaureate education and by recognizing that the college graduate is an able learner by virtue of previous educational and life experiences.

For more information about the program, visit Nursing, Accelerated Bachelor of Science (ABS) (<https://www.pace.edu/program/nursing-accelerated-bachelor-of-science?college-health-professions>).
